Application

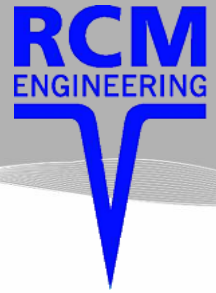

This electronic bartacking machine is for sewing the bartacks to the cut lifttapes. The bartacker can be used as a stand-alone machine or directly next to the cutting machine to ensure a continuous and smooth production flow.

With the sewing template for 6, 8 and 10 mm wide lifttapes incl. base plate, the tapes can be sewn easily, safely and quickly. Changing the sewing template takes only a few seconds with the optional quick-change system.

If the lifttape cutter and automatic bartacker are combined at one workstation, a touch panel with integrated PC can be connected to the cutting machine as an expandable option. With this PC, different jobs can be stored or read in and quickly retrieved. This increases productivity and efficiency.

Seam patterns			
F1(A201)	6 and 8mm	single seam lengthwise	
F2(A206)	6mm	single seam	
F3(A203)	6mm	double seam	
F4(A208)	8mm	single seam	
A202	8mm	double seam	

Characteristics

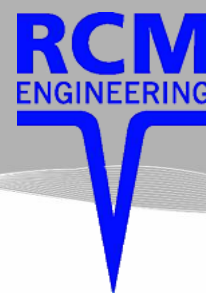

- Seam image zig-zag bar lengthwise or crosswise to the tape.
- The respective programmes can be called up directly via the keyboard.
- Fast sewing cycle for high production output.
- Base plate with sewing template for 6, 8 or 10mm take-up tape with special finger protection.
- Special thread cutter for short thread ends.
- Thread wiper; standard hook; clamp ventilation.
- Stitch rate maximum 3'200 stitches/minute.
- AC servo motor 550W (direct drive); single-phase 230V.
- LED sewing light integrated.
- Reinforced steel frame, height adjustable.
- Complete with sewing table, foot pedal, steel frame and sewing lamp.
- Machine weight complete 70kg.
- Special features:
 - larger multilayer table top 110 x 69cm
 - adapted needle hole
 - includes 3 sewing programmes for 6, 8 and 10mm lifttape
 - further customised seam programmes on request
- Options:
 - Quick-change system for sewing clamps (sewing templates for 6, 8 and 10mm wide lifttapes)

Your benefits

- Can be combined with any cutting machine.
- Simple operation.
- Extremely low risk of injury due to finger protection.
- High-quality components and workmanship of the machine.
- Fast sewing cycle for high production output.
- Templates for 6, 8 and 10 mm wide lifttape guarantees high quality and a clean seam pattern.
- With quick-change system, the inserts can be changed within a few seconds.
- Optional touch panel for cutting machine ensures even higher productivity at the combined workstation.
